NESIC establishes joint company with KDDI for construction of mobile infrastructure

NEC Networks & System Integration Corporation (Head Office: Bunkyo-ku, Tokyo, President: Yushi Ushijima, Tokyo Stock Exchange: 1973, NESIC) today announced the establishment of K&N System Integration Corporation (KNSI), which will operate a business involving mobile infrastructure construction as a joint company with KDDI CORPORATION (KDDI). The investment ratio is 51% for NESIC and 49% for KDDI.

NESIC will handle every process from wireless engineering to the installation of base stations with a consistent approach. In particular, it has strength in the area design technology, enabling the effective allocation of base stations.

KNSI is developing and refining base station area design tools and automatizing operation processes by combining NESIC's technologies with KDDI's mobile network operation technologies. This challenge will enable KNSI to effectively contributing to the prompt deployment of a high-quality network by installing mobile base stations, including 4G LTE.

Going forward, KNSI will incorporate its accumulated know-how into AI and aim for speedy and effective installation design and the construction of base stations.

A profile of the joint company is as follows:

Company Name	K&N System Integration Corporation
President	Masao Wada (Chairman of the Board in NESIC)
Description of business	Construction of base stations for mobile communications, base station area design, fixed communication, etc.
Address	Nishi-shinjuku, Shinjuku-ku, Tokyo
Date of establishment	May 15, 2018
Capital/Shareholder composition	250 million yen (as of August 1, 2018) NESCI: 51%, KDDI: 49%
Number of employees	Approx. 110
