September 1, 2011

NEC Networks & System Integration Corporation
(TSE: 1973)

Announcement of Change of Industry Classification Under Which Shares of NEC Networks & System Integration Corporation Are Classified

Please be advised that the industry classification under which the shares of NEC Networks & System Integration Corporation on the Tokyo Stock Exchange will be changed, effective October 3, 2011, from "Construction" to "Information & Communication." The change has been made by the Securities Identification Code Committee.

Accordingly, the position of the Company's shares on the stock-related pages of newspapers will also change. However, the securities code will remain "1973."

Please refer to the following information:

1. Present and Changed Industry Classifications

	Present Classification	Classification After Change
Main Classification	Construction	Transportation, Information & Communication
Sub Classification	Construction	Information & Communication

2. Reason for the Change

NEC Networks & System Integration Corporation has been evolving and expanding from a business focusing on the installation and construction of network infrastructure at the time of its listing in 1983, to a business providing comprehensive ICT services encompassing proposal, planning, systems integration, operation, maintenance, and cloud/outsourcing services for customers ranging from enterprises, through telecommunications carriers, to governments. A regular review on industry classifications was recently conducted by the Securities

Identification Code Committee. As a result of the examination, the Company met the Committee's criteria for changing industry classification.

3. Effective Date of the Change
 October 3, 2011 (Monday)

 NEC Networks & System Integration Corporation will continue to pursue growth and improvements in its corporate value as a "service integrator" providing ICT services that add value for customers. The Company appreciates the continued understanding and cooperation of its stakeholders.
