CORPORATE PROFILE

NEC Networks & System Integration Corporation

NEC Networks & System Integration Corporation Group Statement

The NEC Networks & System Integration Corporation Group enables communities throughout the world to enjoy a safe, secure and plentiful tomorrow by continually facilitating more welcoming and convenient communications, and supporting a connected society, from the floor of the ocean to the far reaches of outer space, with proven technologies and reliable services cultivated over many years.

Corporate Message

Re-designing your Communication

The NEC Networks & System Integration Corporation Group Statement and Corporate Message were crafted based on the NEC Way with discussions involving all employees.

Message from the President

The NESIC Group is committed to reforming itself and elevating society.

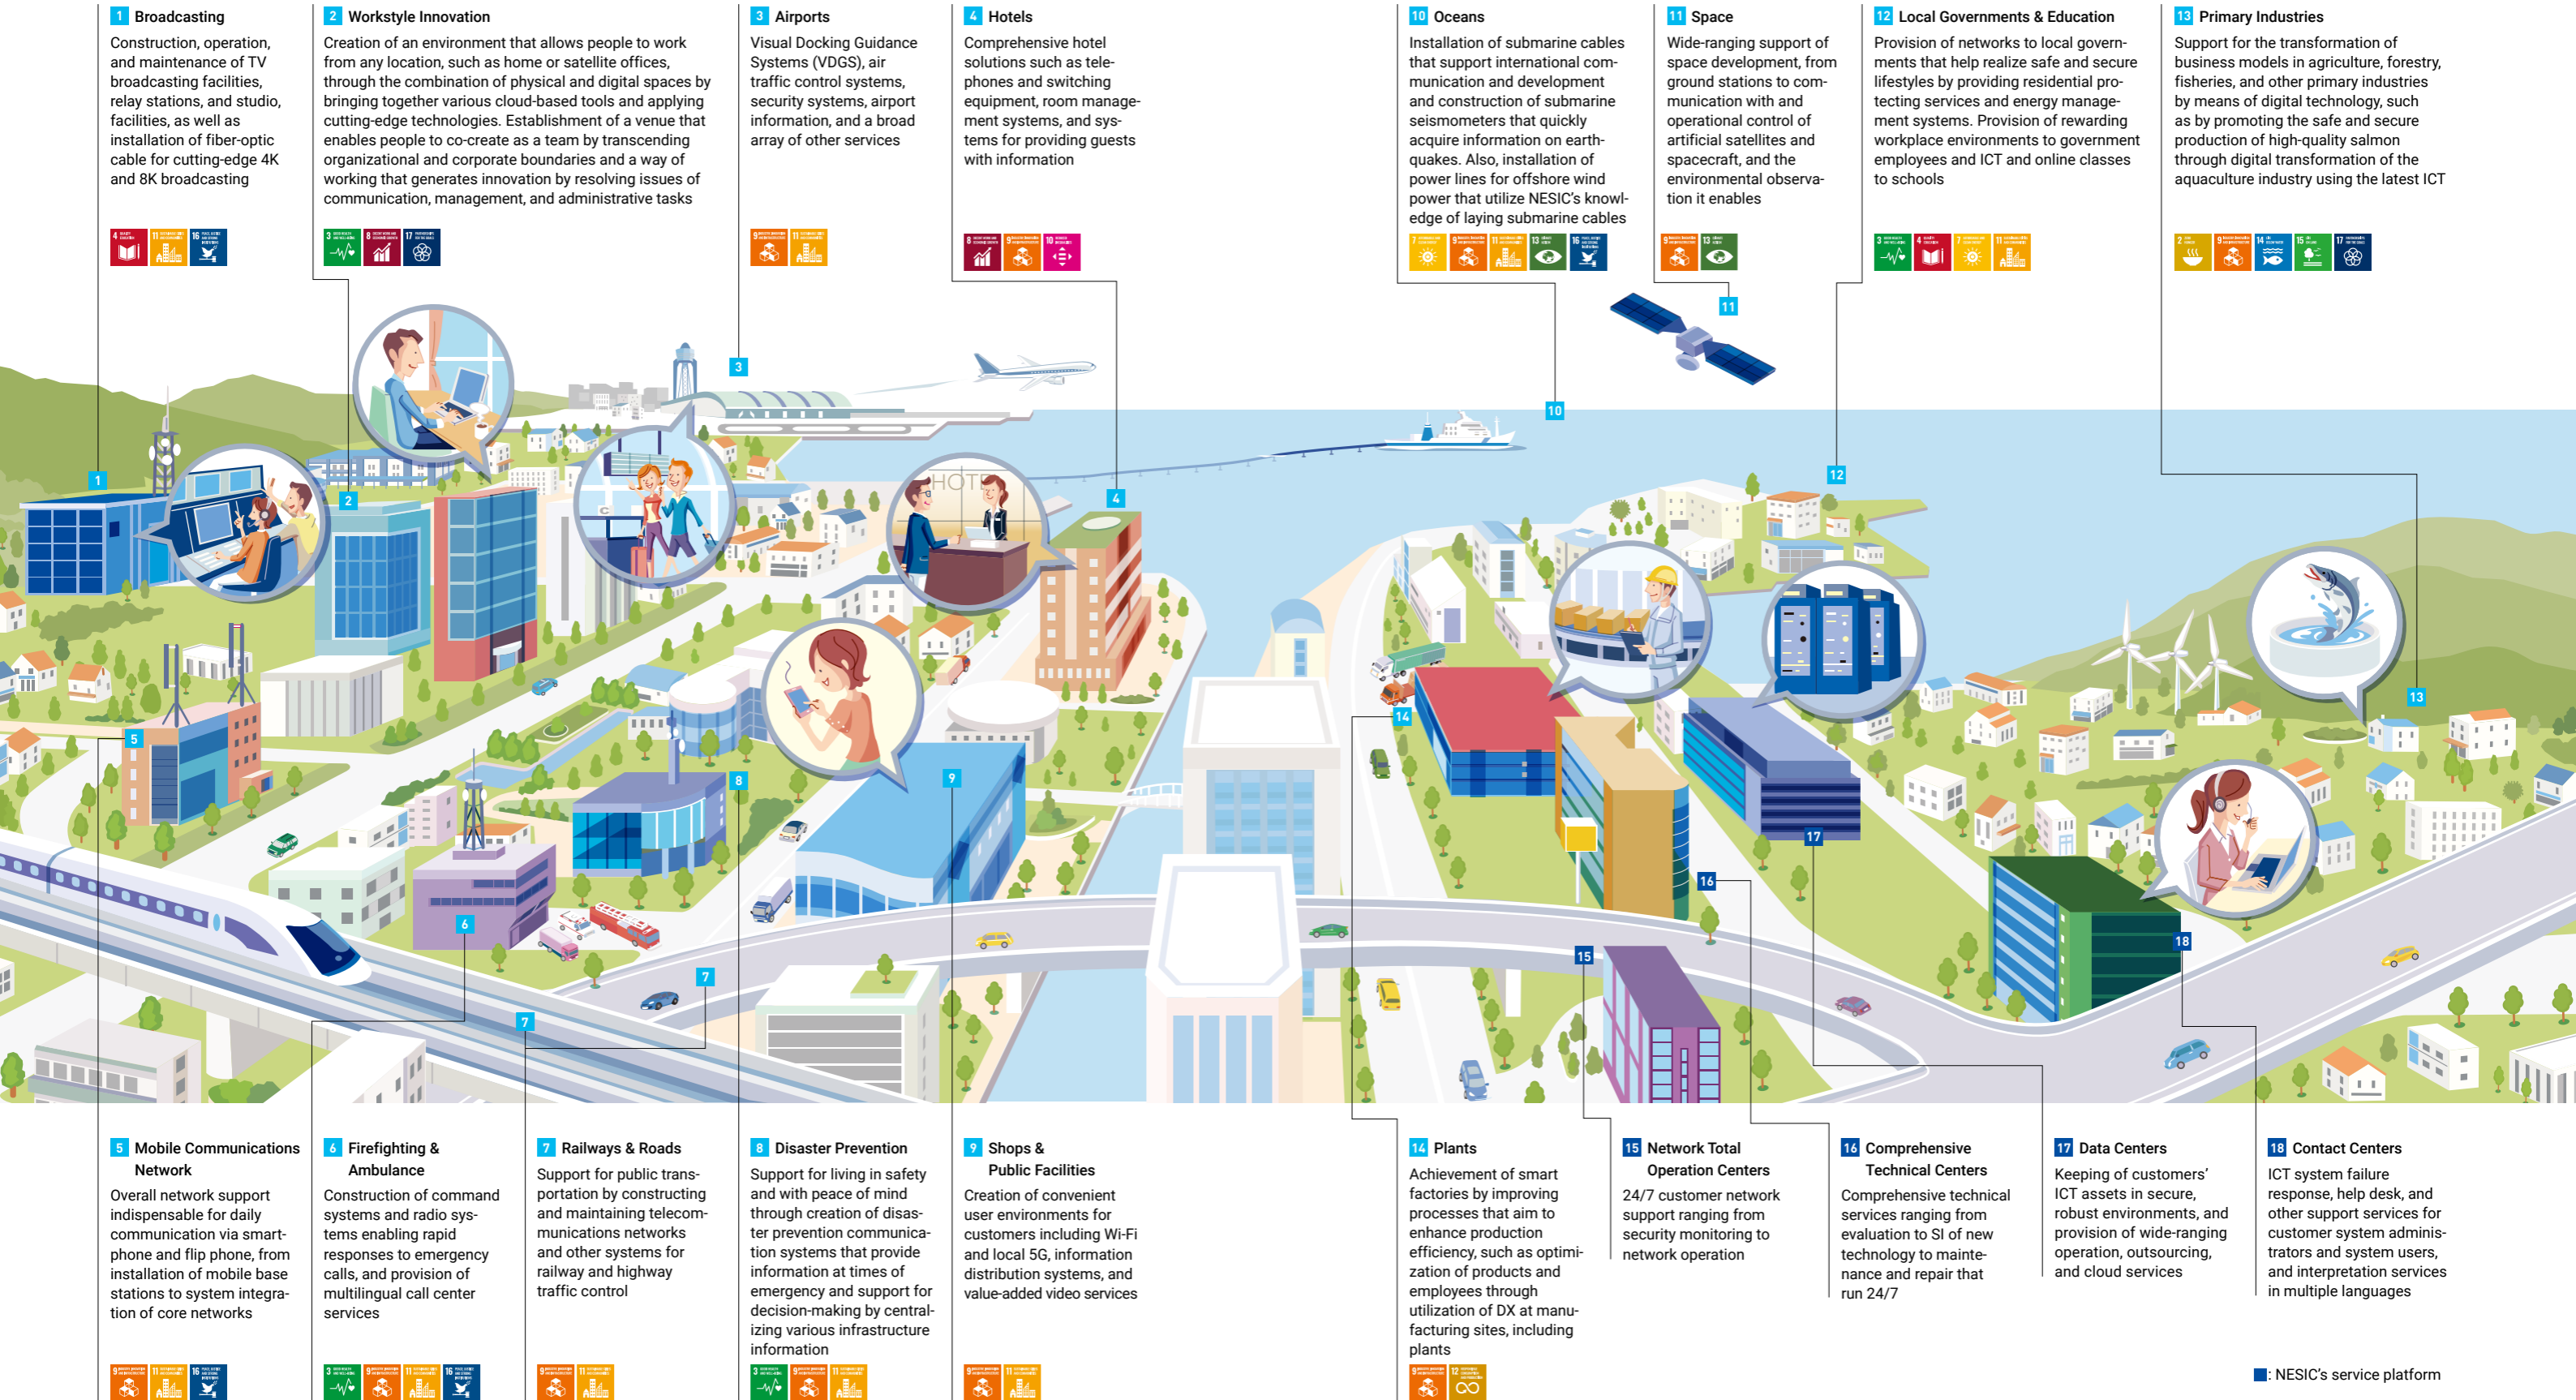

NEC Networks & System Integration Corporation (NESIC) was established in 1953 as a telecommunications infrastructure construction company. We have since expanded our business domains centering on telecom infrastructure both in Japan and overseas and corporate networks in line with advances in communication technologies and changes in social issues. Today, we serve as a "Communication Services Orchestrator" to provide values for various customers including enterprises, telecommunications carriers, government offices and social infrastructure business operators with a wide variety of businesses, including system integration, construction and services.

Recent years have seen a spread of digital technologies represented by cloud services as well as next-generation communication technologies such as 5G. Enterprises and local governments are now making full-scale efforts in digital transformation (DX). In this situation, in May 2022, we have established a medium-term management plan "Shift up 2024" for a three-year period from FY2022 to FY2024. It addresses the realization of DX and beyond-5G next-generation networks that are being implemented in society and the acceleration of innovation for creating new social value.

"Shift up 2024" aims to advance relationships with customers and our business models by carrying out our own reforms. Our long-term vision for society reads: An inclusive and sustainable society created through communications. The state of "Sustainable Symphonic Society" mentioned in "Shift up 2024" is a point that we should reach in 2030 on our way towards the vision. With the NEC Networks & System Integration Corporation Group Statement, which defines our mission, we will strive towards realizing the vision for society. We ask for your further support for the NEC Networks & System Integration Corporation Group.

NEC Networks & System Integration Corporation
President and Chief Operating Officer (COO)

NESIC Contributes to a Safe, Secure, and Plentiful Tomorrow in Various Contexts of Daily Life.

Shift up 2024

Elevating society

We have established the medium-term management plan “Shift up 2024” for the three-year period from FY2022 to FY2024. “Shift up 2024” aims to advance our business models and relationships with customers by carrying out our own reforms, while creating new social value with the realization of DX and Beyond-5G next-generation networks.

2020s-

As a communication services orchestrator

We offer new social value with our partners, leveraging NESIC Group strengths

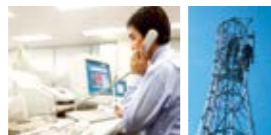

2010s-

As a solution provider

1990s-

As a system integrator

1960s-

Building overseas infrastructure

1953-

Founding: Telecommunications Construction

Business Segments

DX Solutions Business

We are engaged in enterprise DX business, domestically and internationally, as well as the implementation of related ICT systems and offering BPO services.

Accelerating DX Business

With advanced operation services enabled by practical expertise and unique multi-cloud services, we solve challenges our customers are facing as a strategic partner.

Network Solutions Business

We offer large-scale, highly reliable and resilient carrier-grade systems and ICT infrastructure to public network operators.

Expanding our value with next-generation networks

Based on the trust cultivated through proven records with network operators, we will extend value offerings to operation and DX services. We will also utilize local 5G to address our customers' business issues.

Environmental & Social Solutions Business

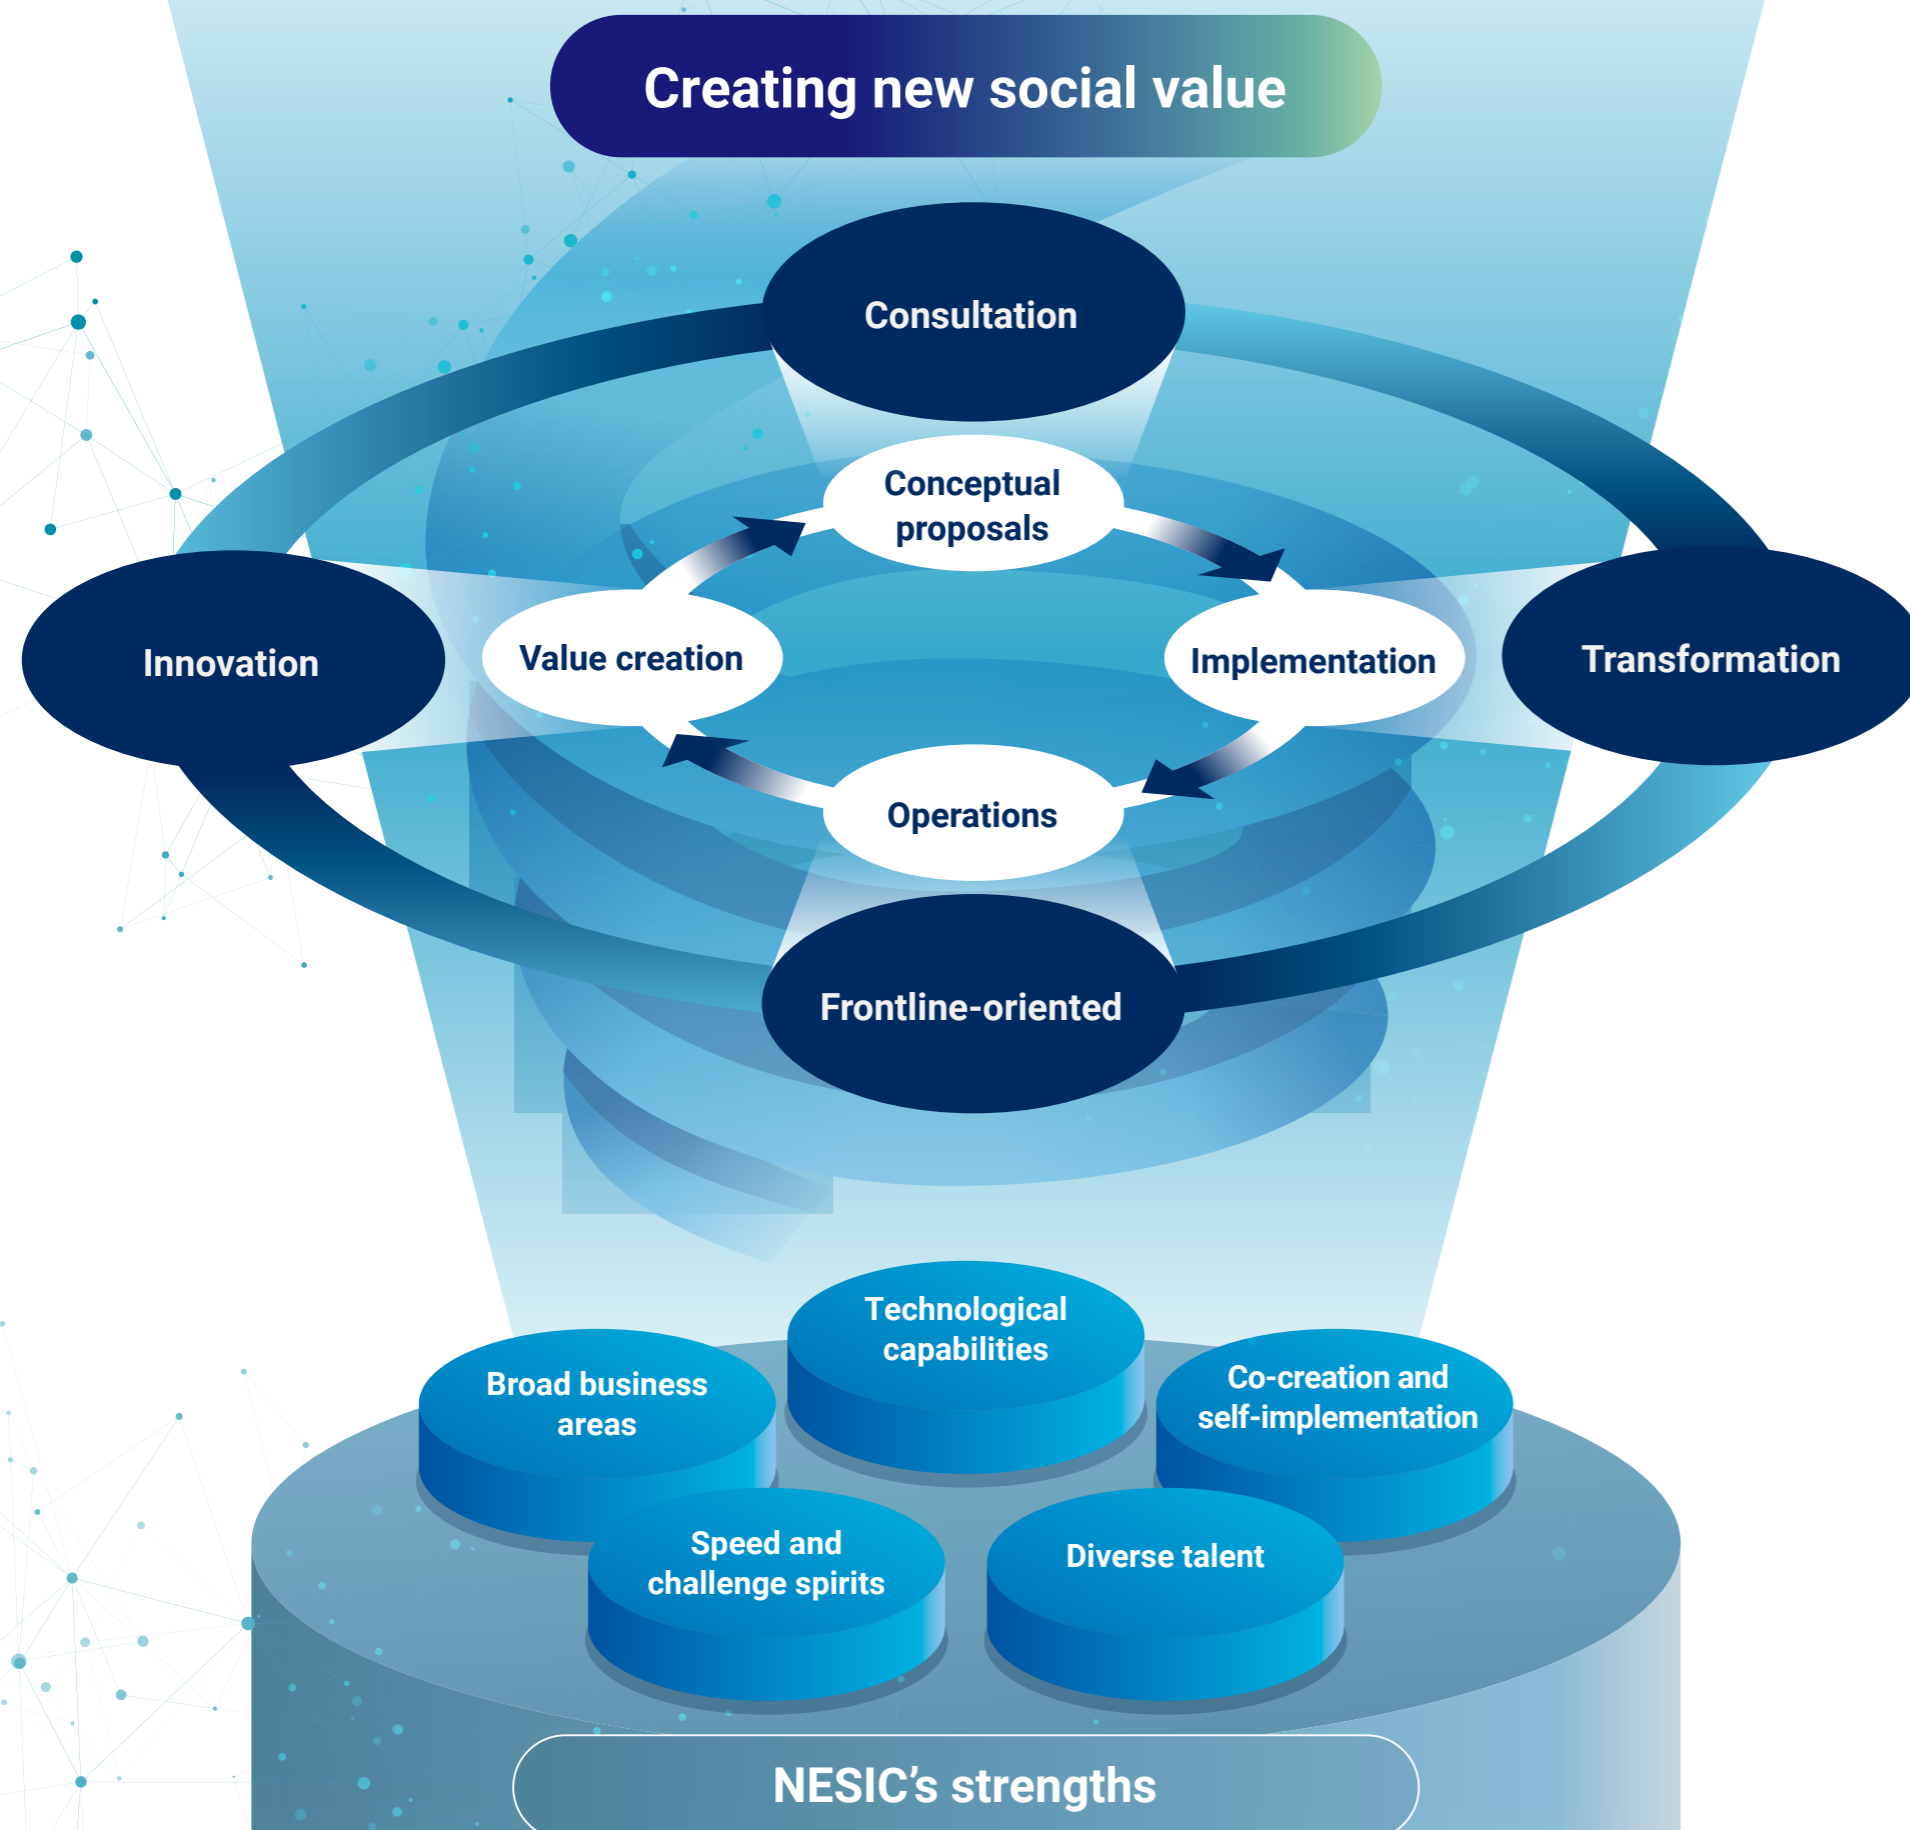

We offer ICT systems and services focused on the public DX and environmental energy sector as well as engineering and O&M services in Japan and overseas.

Enhancing the Structure for Public DX, Environmental and Social Solutions Business

Based on our experience and expertise in the social and public domain, we will promote safe, secure, and environmentally sustainable cities development by utilizing DX services and next-generation networks.

What We Do to Create New Social Value

NESIC strives to solve social issues with “technological capabilities”, “co-creation and self-implementation”, “diverse talent”, “speed and challenge spirits” and “broad business areas” as our strengths. Shift up 2024 aims to add value to our own through customer relations such as “conceptual proposals”, “implementation”, “operations”, and “value creation”, in order to create new social value.

Conceptual proposals

We provide **consultation** that leads to solutions based on our own expertise and frontline-oriented perspective.

Implementation

We help customers achieve their **transformation** by applying experience-driven DX to their business and operations.

Operations

With **frontline-oriented** mindset, we are committed to staying close to our customers and supporting them through their transformation, leveraging our wide range of business operations from upstream to downstream.

Value creation

We utilize the data and insights gained from our interactions with customers to drive **innovation** that enhances value.

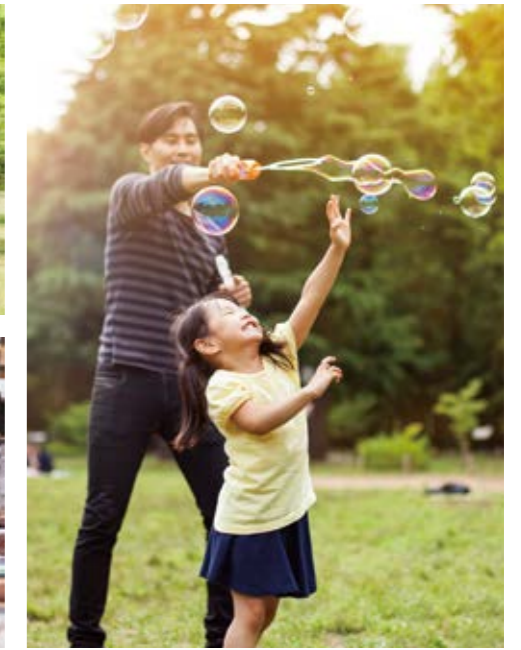

NESIC continues to promote this cycle, building long-term trusting relationships with our customers and partners as we aim to realize a “Sustainable Symphonic Society.”

NESIC's Sustainability Management

We have established our Group Sustainability Policy based on the belief that supporting the sustainable development and growth of society and our customers will lead to our own sustainable growth. Through our corporate activities and businesses, we are committed to realizing safe, secure, and comfortable lifestyles while maintaining and improving the global environment.

In addition to fulfilling our responsibilities as a corporation by strengthening our efforts to address climate change and consider human rights, we aim to maximize the social value we provide and solve social issues through innovation, utilizing DX and next-generation network technologies. We will work together with our stakeholders to create an inclusive and sustainable society.

Sustainable Symphonic Society

Vision for Society in 2030

We have set forth "Sustainable Symphonic Society," the realization of a sustainable society with prosperity that resonates for all, as our vision for society in 2030.

With this as a milestone, we will continue to provide new value to society and achieve our own sustainable growth under the NEC Networks & System Integration Group Statement, aiming for "a comprehensive and sustainable society created through communication".

Providing services that are one step ahead of social and technological changes

- Decarbonation
- Creating vibrant cities
- Smart industries
- More free workstyles and lifestyles
- Safety Security
- Health Well-being

Sustainability Policy

Environment

We will endeavor to reduce environmental impacts of our overall business activities and to mitigate the impact of climate change.

When offering ICT solutions and services, we will be aware that they have environmental impacts in each phase of the life cycle and work to save resources and energy, and to prevent environmental contamination with waste, aiming to reduce our environmental footprint.

Social

To help customers resolve their issues, we will consistently offer high-quality and secure products and services to continuously create new social value.

By improving the well-being of all employees, we will create a work environment in which each of them can take the initiative. In addition, we will help employees with diverse personalities to showcase their innovative capabilities and to create new value.

We will build mutual relationships of trust with business partners and conduct fair transactions with them. We will continue our actions for revitalizing local and other communities.

Governance

We will establish a management system for swift and appropriate decision-making in response to changes in the business environment and will make timely and appropriate disclosures as part of commitment to ensuring management transparency and soundness.

Through these activities, we will continue to provide sustainable value to society.
